

ON-SITE TRAINING · ENGLISH OR SPANISH

Scaffolding Safety Training

Training delivered at your jobsite, scheduled around your crew's workday. Courses cover OSHA 29 CFR 1926 Subpart L, including the 1926.454 training requirement for anyone who erects, alters, inspects, uses, or dismantles scaffolding.

Every course is taught in English or Spanish at the same price.

Travel mileage is calculated by the distance to your jobsite and quoted before the class is booked.

Supported Scaffolding

Scaffolding that stands on the ground — frame, pump jack, and mast climbing systems. Erection, inspection, access, planking, guardrails, and load limits.

Suspended Scaffolding

Swing stage and other platforms hung from above. Rigging, counterweights, tie-off, inspection, and safe operation. Higher risk, with its own OSHA requirements.

Both course levels are available for either type of scaffolding

COURSE	PRICE PER PERSON
OSHA User Awareness & Operator Training	\$300
OSHA Scaffolding Competent Person	\$350

Your trainer: Edwin Cueva, M.Eng

- OSHA-authorized Outreach trainer — official Department of Labor course completion cards
